Discrete Mathematics in Computer Science

September 18, 2024 — A1. Organizational Matters

A1.1 Organizational Matters

A1.2 About this Course

A1.1 Organizational Matters

People

Lecturers

Malte Helmert

- ▶ **email:** `malte.helmert@unibas.ch`
- ▶ **office:** room 06.004, Spiegelgasse 1

Gabi Röger

- ▶ **email:** `gabriele.roeger@unibas.ch`
- ▶ **office:** room 04.005, Spiegelgasse 1

Assistant

Florian Pommerening

- ▶ **email:** `florian.pommerening@unibas.ch`
- ▶ **office:** room 04.005, Spiegelgasse 1

People

Tutors

- ▶ Maria Desteffani (maria.desteffani@unibas.ch)
- ▶ Benedikt Heuser (ben.heuser@unibas.ch)
- ▶ Rama Mani (r.mani@stud.unibas.ch)

Target Audience

target audience:

- ▶ this is an introductory course on the Bachelor's level
- ▶ we cover mathematical foundations that are particularly useful for the computer science curriculum
- ▶ main target audience: B.Sc. Computer Science, 1st semester
- ▶ all other students welcome

Enrolment

- ▶ `https://services.unibas.ch/`
- ▶ **official deadline:** October 14
- ▶ better today, so that you get all relevant emails and access to the ADAM workspace

Discrete Mathematics Course on ADAM

ADAM

<https://adam.unibas.ch/>

- ▶ link to website with slides
- ▶ submission of exercise sheets
- ▶ model solutions for exercise sheets
- ▶ link to Discord server (for interaction among participants, but you also get answers from lecturers, assistant and tutors)
- ▶ additional material

Language

- ▶ The course is taught in English.
- ▶ All lecture material is in English.
- ▶ We (lecturers, assistant, tutors) speak German and English.
- ▶ You are also welcome to ask questions in German.
- ▶ Also exercise submissions can be in English or German.

Lectures

- ▶ Mon 16:15 - 18:00; Hörsaal U1.131, Biozentrum and
Wed 16:15 - 17:00; Hörsaal 1, Pharmazentrum
- ▶ first half of the course taught by Gabi Röger,
second half by Malte Helmert
- ▶ on December 18: **Q&A session for exam preparation**

Exercises

Exercise sheets (homework assignments):

- ▶ mostly theoretical exercises
- ▶ exercise sheets on ADAM every Monday after the lecture
- ▶ must be solved in **groups of two or three** (not alone or in larger groups)
- ▶ due Monday 4pm the following week (upload to ADAM at <https://adam.unibas.ch/>)
- ▶ we only accept readable PDFs
→ with a bonus point per sheet created with \LaTeX

Question: Who has experience with \LaTeX ?

Exercise Sessions With Tutors

Exercise Sessions (starting September 25/26)

Wed 17:15 - 18:00 Seminarraum 05.001, Spiegelgasse 5
with Maria (Sep 25: Florian)

Wed 17:15 - 18:00 Seminarraum U1.195, Biozentrum
with Rama

Thu 17:15 - 18:00 Seminarraum 00.003, Spiegelgasse 1
with Benedikt
on Sep 26: U1.141, Biozentrum

- ▶ common mistakes/misconceptions
(full model solutions on ADAM)
- ▶ questions about exercise sheets and the course
- ▶ as time permits, support while you solve the exercises

important: please fill in the survey on ADAM for the group assignment until **Friday 12:00** (September 20).

Exam

- ▶ Written exam
- ▶ 6 ECTS credits
- ▶ Monday, January 20, 2025, 4-6 pm
- ▶ admission to exam: 50% of the exercise marks
- ▶ grade for course determined exclusively by the exam

Required Time

Official calculation

- ▶ 1 CP \approx 30 hours
- ▶ The course has 6 CP.
- ▶ You need to invest about 180 hours.
- ▶ With 40 hours for exam preparation, this leaves **10–11 hours/week** during the teaching period.

Alternative calculation

- ▶ A fulltime student achieves 30 CP per semester.
- ▶ The course corresponds to a 5th of 30 CP.
- ▶ With a 42h week, this still corresponds to **8.4 hours/week**.

Plagiarism

Plagiarism (Wikipedia)

Plagiarism is the “wrongful appropriation” and “stealing and publication” of another author’s “language, thoughts, ideas, or expressions” and the representation of them as one’s own original work.

consequences:

- ▶ 0 marks for the exercise sheet (first time)
- ▶ exclusion from exam (second time)

if in doubt: check with us what is (and isn't) OK before submitting exercises too difficult? we are happy to help!

Special Needs?

- ▶ We (and the university) strive for equality of students with disabilities or chronic illnesses.
- ▶ Contact the lecturers for small adaptations.
- ▶ Contact the Students Without Barriers (StoB) service point for general adaptations and disadvantage compensation.

A1.2 About this Course

Content: Discrete Mathematics in Computer Science

- ▶ mathematical thinking and proof techniques
- ▶ sets and relations
- ▶ group theory and permutations
- ▶ modular arithmetic
- ▶ graphs and trees
- ▶ formal logic

Learning Goals

- ▶ proficiency in abstract thinking
- ▶ ability to formalize mathematical ideas and arguments
- ▶ knowledge of common mathematical tools in computer science
