Definitions 0000000	DDA Complexity	Approximation Algorithms	Results 000000000	Conclusion •
Conclusi	on			

- DDA heuristics are PSPACE-hard to compute
- approximation algorithms are necessary
 ⇒ most promising approach: abs-DDA potential heuristics

▲□▶ ▲□▶ ▲□▶ ▲□▶ □ のQで

- outscaled by PDBs (PDB computation is more efficient)
- Heuristic quality is comparable to PDBs
